MIX AND MATCH SETTINGS

Putting together the little ones at one wedding table means kids can play and chat together, happily. You want to make sure your children's table looks enticing to the younger guests, which means they're much more likely to sit down (and behave!). Set the scene with colourful napkins, cute table runners, bunting or balloons and flags. Having miniature games in a designated space will effortlessly add an element of fun too. Alternatively, you can use a plain white table cloth so children can draw over it with colourful crayons and pens. Little ones won't be able to resist bagging their place!

PRETTY PASTEL PICNICS

Even choosing a special children's menu might be a good fit for your wedding. For a summer soiree, your little guests might prefer picnic-style snacks, or non-spicy food to graze on. Make their wedding banquet varied, interactive and interesting and they'll keep entertained for hours on end. Hip Hip Hooray! ■
